The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. *Description of Request:* PacifiCorp requests a temporary variance to deviate from the reservoir elevation operating range stipulated under the approved operation plan for the project. The variance would allow PacifiCorp to draw down the reservoir and obtain preliminary data that would inform a number of proposed studies for the project's relicensing process. PacifiCorp would also use the drawdown period to perform maintenance work at the project. PacifiCorp proposes to draw down the reservoir to elevation 4,390.5 feet, which is 15.75 feet below the lower limit of the normal operating range. PacifiCorp plans to begin the drawdown on approximately October 25, 2019, with the target drawdown elevation of 4,390.5 feet being reached by November 1, 2019. PacifiCorp anticipates that it would begin refilling the reservoir on approximately November 8, 2019, with the refill taking approximately eight days to complete.
