in a timely manner; (3) is the estimate of burden accurate; (4) how might the NPS enhance the quality, utility, and clarity of the information to be collected; and (5) how might the NPS minimize the burden of this collection on the respondents, including through the use of information technology.

Abstract: Under the provisions of The Alaska National Interest Lands Conservation Act (ANILCA), subsistence harvests by local rural residents are

considered to be the priority consumptive use of park resources. This collection gathers information on subsistence harvest patterns and the impact of rural economy from resident zone communities associated with Alaskan parks, preserves, and monuments. The NPS is seeking an extension to continue to survey Alaska residents who customarily and traditionally engage in subsistence uses within a national park, preserve, or monument.

In 2017, the collection was reinstated and increased the scope of inquiry to include the following Alaskan National Parks, Preserves, and Monuments:

- Aniakchak National Monument (ANIA),
- Bering Land Bridge National Preserve (BELA),
- Cape Krusenstern National Monument (CAKR),
- Gates of the Arctic National Park and Preserve (GAAR),
- Kobuk Valley National Park (KOVA),
- Noatak National Preserve (NOAT),
- Wrangell-St. Elias National Park and Preserve (WRST) and

- Yukon-Charley Rivers National Preserve (YUCH).

This survey is conducted through in-person interviews. A facilitator collects information about harvests, uses, and sharing of subsistence resources. Search and harvest areas are also mapped over the course of the interview. The information from this collection will be used by the NPS, the Federal Subsistence Board, the State of Alaska, and local/regional advisory councils in making recommendations and informing decisions regarding seasons and harvest limits of fish, wildlife, and plants in the region which communities have customarily and traditionally used.
