

which include allowable harvest levels (*i.e.*, annual catch target (ACT) and HG), an annual catch limit (ACL), and annual catch reference points (*i.e.*, OFL and ABC). The uncertainty surrounding the current biomass estimates for Pacific mackerel for the 2019–2020 and 2020–2021 fishing seasons was taken into consideration in the development of these harvest specifications. The Pacific mackerel fishing season runs from July 1 to June 30. Any Pacific mackerel harvested between July 1, 2019, and the effective date of the final rule would count toward the 2019–2020 ACT and HG.

The Council has recommended, and NMFS is implementing, Pacific mackerel harvest specifications for both the 2019–2020 and 2020–2021 fishing seasons. For the 2019–2020 Pacific mackerel fishing season these include an OFL of 14,931 mt, an ABC and ACL of 13,169 mt, a HG of 11,109 mt, and an annual ACT of 10,109 mt. For the 2020–2021 Pacific mackerel fishing season these include an OFL of 11,772 mt, and ABC and ACL of 10,289 mt, a HG of 7,950 mt, and an ACT of 6,950 mt. These catch specifications are based on the control rules established in the CPS FMP and biomass estimates of 71,099 mt (2019–2020) and 56,058 mt (2020–2021). The biomass estimates are the result of a full stock assessment the NMFS SWFSC completed in June 2019 (see **ADDRESSES**). The Council's SSC and the Council approved this stock assessment as the best scientific information available for management at the June 2019 Council meeting.

Under this action, in the unlikely event that catch reaches the ACT in either fishing season, directed fishing would close, reserving the difference between the HG and ACT (1,000 mt) as a set-aside for incidental landings in other fisheries and other sources of mortality.¹ For the remainder of the fishing season, incidental landings in CPS fisheries would be constrained to a 45-percent incidental catch allowance (in other words, no more than 45 percent by weight of the CPS landed per trip may be Pacific mackerel); in non-CPS fisheries, up to 3 mt of Pacific mackerel may be landed incidentally per fishing trip. The incidental set-aside is intended to allow continued operation of fisheries for other stocks, particularly other CPS stocks that may school with Pacific mackerel.

The NMFS West Coast Regional Administrator will publish a notice in the **Federal Register** announcing the

date of any closure of directed fishing (when harvest levels reach or exceed the ACT). Additionally, to ensure the regulated community is informed of any closure, NMFS will also make announcements through other means available, including email to fishermen, processors, and state fishery management agencies.

On August 23, 2019, NMFS published a proposed rule in the **Federal Register** (84 FR 44272) soliciting public comments through September 23, 2019. NMFS received two comments from private citizens in support of the proposed rule. This final rule contains no changes from the proposed rule.

Classification

Pursuant to section 304(b)(1)(A) of the Magnuson-Stevens Act, the NMFS Assistant Administrator has determined that this rule is consistent with the CPS FMP, other provisions of the Magnuson-Stevens Act, and other applicable law, subject to further consideration after public comment.

Pursuant to the procedures established to implement Executive Order 12866, the Office of Management and Budget has determined that this final rule is not significant.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration during the proposed rule stage that this action would not have a significant economic impact on a substantial number of small entities. The factual basis for the certification was published in the proposed rule and is not repeated here. No comments were received regarding this certification. As a result, a regulatory flexibility analysis was not required and none was prepared.

This action does not contain a collection-of-information requirement for purposes of the Paperwork Reduction Act.

List of Subjects in 50 CFR Part 660

Fisheries, Fishing, Reporting and recordkeeping requirements.

Dated: November 25, 2019.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 660 is amended as follows:

PART 660—FISHERIES OFF WEST COAST STATES

■ 1. The authority citation for part 660 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*, 16 U.S.C. 773 *et seq.*, and 16 U.S.C. 7001 *et seq.*

■ 2. In § 660.511, add paragraphs (i) and (j) to read as follows:

§ 660.511 Catch restrictions.

* * * * *

(i) The following harvest specifications apply for Pacific mackerel:

(1) For the Pacific mackerel fishing season July 1, 2019, through June 30, 2020, the harvest guideline is 11,109 mt and the ACT is 10,109 mt; and

(2) For the Pacific mackerel fishing season July 1, 2020, through June 30, 2021, the harvest guideline is 7,950 mt and the ACT of 6,950 mt.

(j) When an ACT in paragraph (i) of this section has been reached or exceeded, then for the remainder of the Pacific mackerel fishing season, Pacific mackerel may not be targeted and landings of Pacific mackerel may not exceed: 45 percent of landings when Pacific mackerel are landed in CPS fisheries (in other words, no more than 45 percent by weight of the CPS landed per trip may be Pacific mackerel), or up to 3 mt of Pacific mackerel when landed in non-CPS fisheries. The Regional Administrator shall announce in the **Federal Register** the date that an ACT is reached or exceeded, and the date and time that the restrictions described in this paragraph go into effect.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 180713633–9174–02; RTID 0648–XY056]

Fisheries of the Exclusive Economic Zone Off Alaska; Pacific Ocean Perch in the Bering Sea Subarea of the Bering Sea and Aleutian Islands Management Area

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS is prohibiting directed fishing for Pacific ocean perch in the Bering Sea subarea of the Bering Sea and Aleutian Islands management area (BSAI). This action is necessary to prevent exceeding the 2019 Pacific

¹Directed fishing for live bait and minor directed fishing is allowed to continue during a closure of the directed fishery.

Ocean perch total allowable catch (TAC) in the Bering Sea subarea of the BSAI.

DATES: Effective 1200 hrs, Alaska local time (A.l.t.), November 27, 2019, through 2400 hrs, A.l.t., December 31, 2019.

FOR FURTHER INFORMATION CONTACT:

Steve Whitney, 907-586-7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the BSAI according to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The 2019 Pacific ocean perch TAC in the Bering Sea subarea of the BSAI is 14,675 metric tons (mt) as established by the final 2019 and 2020 harvest specifications for groundfish in the BSAI and groundfish reserve release (84 FR 9000, March 13, 2019 and 84 FR 57653, October 28, 2019).

The Regional Administrator has determined that the 2019 TAC for Pacific Ocean perch in the Bering Sea subarea of the BSAI will soon be reached. Therefore, the Regional Administrator is establishing a directed fishing allowance of 14,625 mt, and is setting aside the remaining 50 mt as bycatch to support other anticipated groundfish fisheries. Consequently, in accordance with § 679.20(d)(1)(iii), NMFS is prohibiting directed fishing for Pacific ocean perch in the Bering Sea subarea of the BSAI. While this closure remains in effect the maximum retainable amounts at § 679.20(e) and (f) apply at any time during a trip.

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA (AA), finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B) as such requirement is impracticable and contrary to the public interest. This requirement is

impracticable and contrary to the public interest as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would delay the directed fishing closure of Pacific ocean perch in the Bering Sea subarea of the BSAI. NMFS was unable to publish a notification providing time for public comment because the most recent, relevant data only became available as November 25, 2019.

The AA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

This action is required by § 679.20 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 26, 2019.

Jennifer M. Wallace,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.
