

collect student data for their programs and are also covered by this notice. Undergraduate scholarship recipients are required to complete a Student Scholarship Training Record to track their time, attendance, and accomplishments during their internships. NOAA OEd student scholar alumni are also requested to provide information to NOAA for internal tracking purposes. This information informs NOAA whether NOAA-funded students pursue and complete post-graduate NOAA-related science degrees, are employed by NOAA or a NOAA contractor, or in fields related to NOAA's mission. NOAA OEd grant recipients are required to update the student tracker database with the required student information in order to assess compliance with NOAA OEd's performance measures.

The collected data supports NOAA OEd's program performance measures. To measure the impact of OEd programs, the data collected are compared to the available data in the national education databases (*e.g.*, National Science Foundation and National Center for Education Statistics) and NOAA workforce management database. Furthermore, the student data collection identifies degree pipeline areas (BS, MS, or Ph.D.) and where OEd and its academic partners may target recruitment for its' NOAA-related science educational and training programs. NOAA scholarship programs produce a pool of qualified candidates that may be hired by NOAA and help to sustain a world-class NOAA organization.
