SUPPLEMENTARY INFORMATION:

I. Abstract

The Electronic Health Record System is used by the NASA Occupational Health Program to generate records of medical care, diagnosis, treatment, surveillance examinations (e.g., flight certification, special purpose and health maintenance), and exposure records (e.g., hazardous materials and ionizing radiation). Management and utilization of the Electronic Health Record System provides necessary supportive clerical services for the Occupational Health Program. Occupational Health clinics create, maintain and securely archive digital medical records and physical examination records of (1) NASA civil service employees and applicants; (2) other Agency civil service and military employees working at NASA; (3) active or retired astronauts and active astronaut family members; (4) International Space Partner personnel, their families, or other space flight personnel on temporary or extended duty at NASA; (5) onsite contractor personnel who receive job-related examinations under the NASA Occupational Health Program, have work-related mishaps or accidents, or visit clinics for emergency or first-aid treatment; and (6) visitors to NASA Centers who use clinics for emergency or first-aid treatment or who apply for use of NASA facilities. The legal medical record is the documentation of health care services provided to an individual; it is used for clinical decision making, following accurate recording of observations, actions and analysis of diagnostic tests. The legal medical record in this instance is digital recorded data collected and used for providing healthcare at the NASA Occupational Health clinics. Additionally, the medical record is used as a tool for evaluating the adequacy, appropriateness and quality of care. Such records contain standard clinical information resulting from physical examinations, laboratory and other relevant diagnostic tests, and medical history surveys; screening examination results; immunization records; administration of medications prescribed by private/personal or NASA physicians; consultation records; and hazardous exposure as well as other health hazard/abatement data.

NASA collects, archives, and secures information from individuals visiting the Occupational Health clinics requiring routine medical examination in compliance with the following regulations:

- 2015 Joint Commission (JC) Standards for Ambulatory Care IM.01.01.01, IM.02.01.03, IM.02.02.01, IM.02.02.03
- NASA Procedural Requirements, NPR 1800.1C.
- NASA Records Retention Schedules NRRS 1441.1
- 5 U.S.C. 552a, Privacy Act, 1974
- 42 U.S.C. 2472; 44 U.S.C. 3101; Public Law 92–255
- NIST SP 800–53 revision 4, Recommended Security Controls for Federal Information Systems
- NIST SP 800–53A, Techniques and Procedures for Verifying the Effectiveness of Security Controls in Federal Information Systems
